Core Principles of Contract Law According to Avtar Singh

1. Offer and Acceptance

A valid contract begins with an offer made by one party and an acceptance by the other. Avtar Singh emphasizes that:

- An offer must be clear, definite, and communicated to the offeree.
- Acceptance must be absolute, unconditional, and communicated in the manner prescribed or usual.
- Timing and place of offer and acceptance are crucial in determining contractual validity.

2. Consideration

Consideration refers to something of value exchanged between parties. According to Avtar Singh:

- It must be lawful, real, and sufficient.
- It can be in the form of money, goods, services, or forbearance.
- In India, a promise without consideration is generally not enforceable, except in specific cases like contracts made on account of natural love and affection.

3. Capacity to Contract

Legal capacity is fundamental for the validity of a contract. Avtar Singh highlights:

- Minors, persons of unsound mind, and certain persons disqualified by law cannot contract.
- Contracts entered into by minors are generally void, but contracts for necessities may be enforceable.

4. Free Consent

Consent must be free and genuine, free from misrepresentation, fraud, undue influence, coercion, or mistake. Singh notes:

- If consent is obtained through coercion or fraud, the contract is voidable.
- Ensuring free consent is vital for the enforceability of contracts.

5. Legality of Object and Consideration

Both the object of the contract and the consideration must be lawful. Singh emphasizes that:

- Contracts with unlawful objectives, such as illegal activities, are void.
- Lawful consideration and object are necessary for a valid contract.

Legal Remedies and Enforcement

Avtar Singh underscores the importance of remedies available when contractual obligations are breached. The primary remedies include:

- **Damages:** Monetary compensation for loss caused by breach.
- **Specific Performance:** Court order requiring parties to fulfill contractual obligations.
